

Clinical practice guidelines

MCC of VA has adopted evidenced-based clinical practice guidelines (CPGs) for a wide range of medical conditions and service types delivered in various medical and behavioral health settings. The guidelines provide direction for practitioners for the treatment of preventive, acute or chronic medical services and behavioral health services.

Our CPGs are based on valid and reliable evidence or a consensus of healthcare professionals and service providers in a particular field. The MCC of VA Provider Advisory Committee reviews these practice guidelines annually and updates them as appropriate. You can find our CPGs on the Providers page of MCCofVA.com under the “Provider Materials” heading.
